

# Accessible Web Page Bio

## Overview

You will create a bio about yourself. The purpose is to have some minimal practice using HTML and CSS.

## Requirements

- You will write in HTML and use external CSS for styling
- Make the page accessible based on what you know now about accessible documents and presentations.
- Bio Requirements
  - A recognizable picture of your face
  - Information about you and your interests in accessibility.
    - This can be a way for people to find others for semester projects.
- HTML Requirements
  - Must include
    - Sections with headings
    - Hyperlinks
    - Images
      - At least one non-decorative (i.e. the image contains meaningful content)
      - At least one decorative
    - Form to collect information
      - For example, [forms can be created that send an email.](#)
        - Using the email approach is fine if you don't know how to use scripting to collect data.
    - Lists
    - Semantic text emphasis (e.g. strong, em)

- (Optional) non-formatting table
- Cannot have
  - Any internal or inline CSS
  - Any older formatting html that should be done with CSS (e.g. color)
  - Any non-semantic text markup/emphasis (e.g. bold, italics)
- Your CSS document(s)
  - must include
    - Heading formatting
    - Set the font size

## Submission

- Publish the page somewhere.
  - For example you can use [people.tamu.edu](http://people.tamu.edu)
- Add your name to the [Accessible Web Page Bio Links](#) document.
- Submit a link to your HTML landing page to Canvas..
